Learning Objectives for MPQC Fall 2015 Summit

The teaching/learning objectives for the Summit are to:

1. Understand the Maternal and Neonatal Morbidity and Mortality data profile in Massachusetts.
2. Review the MPNQC Quality Improvement Initiatives.
3. Report on goals achieved and work underway, acknowledging those who have contributed.
4. Introduce the clinical foundation for new work in the Severe Maternal Morbidity project, ie Pregnancy Related Hypertension.
5. Introduce persistent perinatal problems contributing to maternal morbidity and mortality and explore the contributing clinical and social factors.
6. Promote collaboration and partnerships to achieve the goals of the MPNQC, DPH and perinatal health advocacy groups.
7. Appreciate the public's perspective on perinatal health through public media and social networks.
8. Identify resources for continued perinatal quality improvement.
